

WHAT'S THE ONLINE CFI PREP COURSE?

The computer-based review program covers all the sections and tasks identified as being necessary to be a CFI by the national survey. The sections provide the candidate the information necessary to successfully complete the tasks listed under each of the separate sections in the content outline. There is an online self-test at the conclusion of each module, so the candidate can assess his understanding of the material.

Once purchased, you will receive an email with directions on how to access the program. Please note that this program will stay active for 6 months from the time you first log in. After that, there is a \$200 fee to reactivate. This program is required before the CFI Prep Seminar can be attended. Please contact [Emily Kuhn](#) if you have further questions.

*You must complete this online course before you take the prep seminar
